JOURNAL OF AIRCRAFT
Volume 42, No. 6, November–December 2005

2005 *Journal of Aircraft Journal* Index

How to Use the Index

In the Subject Index, pages 1645–1652, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1653–1655, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1656–1664, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2005, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

C05-011 Design of an Aerolevitation Electric Vehicle for High-Speed Ground Transportation System
C05-073 Understanding Abrupt Wing Stall with Computational Fluid Dynamics
C05-075 Computational Study of the Abrupt-Wing-Stall Characteristics of F/A-18E and F-16C
C05-077 F/A-18C to E Wing Morphing Study for the Abrupt-Wing-Stall Program
C05-074 Transonic Experimental Observations of Abrupt Wing Stall on an F/A-18E Model
C05-082 Accomplishments of the Abrupt-Wing-Stall Program
C05-001 Application of System Identification to Aircraft at NASA Langley Research Center
C05-021 Implementation and Validation of the Spalart–Allmaras Turbulence Model in Parallel Environment
C05-009 Flight-Test Estimation of Aircraft Aerodynamic Characteristics—Russian Experience
C05-043 Spanwise Lift Distribution for Blended Wing Body Aircraft
C05-063 Aerodynamic and Static Aeroelastic Characteristics of a Variable-Span Morphing Wing
C05-049 Efficient Optimization Design Method Using Kriging Model
C05-051 Unsteady Trailing Vortex Evolution Behind a Wing In Ground Effect
C05-053 Effect of Trailing-Edge Flap on a Tip Vortex
C05-055 Computations with k-g Model for Complex Configurations at High-Incidence
C05-087 Delta Wing Stall and Roll Control Using Segmented Piezoelectric Fluidic Actuators
C05-028 Large-Area Aerodynamic Control for High-Altitude Long-Endurance Sensor Platforms
C05-120 Sting Effects on Store Captive Loads
C05-085 Simulating the Aerodynamics of the NASA John H. Glenn Icing Research Tunnel
C05-013 Characteristics of Y-Shaped Rectangular Diffusing Duct at Different Inflow Conditions
C05-014 Effect of Airfoil Geometry on Performance with Simulated Intercycle Ice Accretions
C05-038 Review of Unsteady Vortex Flows over Slender Delta Wings
C05-022 Wind-Tunnel Interference Effects on Delta Wing Aerodynamics Computational Fluid Dynamics Investigation
C05-107 Numerical Simulations of Membrane Wing Aerodynamics for Micro Air Vehicle Applications
C05-046 Flow Visualization of Micro Air Vehicle Scaled Insect-Based Flapping Wings
C05-151 Aerodynamic Active Control For Fin-Buffet Load Alleviation
C05-110 Transonic Drag Prediction Using an Unstructured Multigrid Solver
C05-029 Drag Computation and Breakdown in Power-on Conditions
C05-035 Effects of Synthetic Jets on Large Amplitude Sinusoidal Pitch Motions
C05-066 Two Simplified Versions of Supersonic Area Rule
C05-088 Evaluation of the Wright 1902 Glider Using Full-Scale Wind-Tunnel Data
C05-119 Aerodynamic Drag of Streamers and Flags
C05-090 Study of Four-Vortex Aircraft Wakes and Layout of Corresponding Aircraft Configurations
C05-108 Effect of Unsteady Blade Pitching Motion on Aerodynamic Performance of Microrotorcraft
C05-068 Effect of Miniaturized Gurney Flaps on Aerodynamic Performance of Microscale Rotors
C05-070 Inverse Design of Transonic Airfoils Using Parallel Simultaneous Perturbation Stochastic Approximation
C05-158 Near-Surface Topology of Unmanned Combat Air Vehicle Planform: Reynolds Number Dependence
C05-114 Flight-Simulator Study of Airplane Encounters with Perturbed Trailing Vortices
C05-115 Airbus, ONERA, and DLR Results from the Second AIAA Drag Prediction Workshop
C05-069 Near Wake Behind an Airfoil with Leading-Edge Flow Control
C05-089 New Pair of Leading-Edge Vortex Structure for Flow over Delta Wing
C05-187 Support Interference for a Maneuvering Delta Wing
C05-101 Passive Shock Control Concept for Drag Reduction in Transonic Flow
C05-141 Automatic Transition Prediction and Application to High-Lift Multi-Element Configurations
C05-139 Nose Bluntness for Side-Force Control on Circular Cones at High Incidence
C05-137 Modified Shear-Stress Transport Turbulence Model for Supersonic Flows
C05-184 Approach to Induced Drag Reduction with Experimental Evaluation

C05-135 Novel Hierarchical Modular Control Methodology for Closed-Loop-Flow Control Applications
C05-169 Automatic Transition Prediction for High-Lift Systems Using a Hybrid Flow Solver
C05-195 Analysis of Model Rotor Blade Pressures During Parallel Interaction with Twin Vortices
C05-202 Inverse Design of Adaptive Airfoils with Aircraft Performance Considerations
C05-161 On the Uniqueness of the Minimum State Representation
C05-178 Movable Tip Strakes and Wing Aerodynamics
C05-111 Wake Vortex Alleviation Flow Field Studies
C05-102 Birth of Sweepback: Related Research at Luftfahrtforschungsanstalt–Germany
C05-041 Simulation of Aircraft Response to Control Surface Deflection Using Unstructured Dynamic Grids
C05-112 Pressure-Sensitive Paint Measurements in a Blowdown Wind Tunnel
C05-144 Ideal Aerodynamics of Ground Effect and Formation Flight
C05-181 Detached Eddy Simulations for Iced Airfoils
C05-192 Novel Taguchi-Simulated Annealing Method Applied to Airfoil and Wing Planform Optimization
C05-130 Improved Harmonic Large-Angle Fuselage Aerodynamics Model
C05-083 Text Mining the Global Abrupt-Wing-Stall Literature
C05-132 Aerodynamic Drag of Parafoils
C05-191 Effect of Camber on the Aerodynamics of Adaptive-Wing Micro Air Vehicles
C05-166 New Blockage-Correction Method for Separated Flows in a Subsonic Wind Tunnel
C05-138 The Flow on the Apex of a Sharp-Edged Delta Wing
C05-188 Computational Study of F/A-18 E/F Abrupt Wing Stall in the Approach Configuration
C05-185 Vortex-Generator Model and Its Application to Flow Control
C05-142 Data Summary from Second AIAA Computational Fluid Dynamics Drag Prediction Workshop
C05-182 Stall Hysteresis of an Airfoil with Slotted Flap
C05-147 Assessment of Comprehensive Analysis Calculation of Airloads on Helicopter Rotors
C05-071 Maximization of Thrust-Torque Ratio of a Coaxial Rotor
C05-098 Inviscid Wing-Tip Vortex Behavior Behind Wings in Close Formation Flight
C05-145 Tip Vortex Behind a Wing Oscillated with Small Amplitude
C05-097 Two Supersonic Business Aircraft Conceptual Designs With and Without Sonic Boom Constraint
C05-121 A General Purpose Euler and Navier–Stokes Solver for Structured and Unstructured Grids
C05-095 Design and Development of the HondaJet
C05-171 Drag Evolution of a Rectangular Wing with a Triggered Wing-Tip Separation.
C05-189 Drag Prediction of Engine-Airframe Interference Effects with CFX-5
C05-179 Off-Design Reynolds Number Effects for a Supersonic Transport
C05-172 Deforming Grid Technique Applied to Unsteady Viscous Flow Simulation by a Fully Implicit Solver
C05-162 Nonlinearc Aeroelastic Analysis of an Airfoil Using CFD-Based Indicial Approach
C05-204 Optimum Loading of a Wing with a Slit
C05-133 Impingement of a von Karman Vortex Street on a Delta Wing
C05-206 Aerodynamic Characteristics of an Elliptic Airfoil at Low Reynolds Number
C05-165 Shock-Based Waverider Design with Pressure Gradient Corrections and Computational Simulations
C05-170 Wing Tip Vortex in the Near Field: An Experimental Study
C05-134 Biologically Inspired Fixed-Wing Configuration Studies

Aeroelasticity and Aeroservoelasticity

C05-162 Nonlinearc Aeroelastic Analysis of an Airfoil Using CFD-Based Indicial Approach
C05-198 Limit Cycle Oscillation Flight-Test Results for Asymmetric Store Configurations
C05-104 Joined-Wing Aeroelastic Design with Geometric Nonlinearity
C05-045 Airfoil Pitch-and-Plunge Bifurcation Behavior with Fourier Chaos Expansions
C05-199 Robust Match-Point Solutions Using Describing Function Method
C05-036 Extension of Flutter Prediction Parameter for Multimode Flutter Systems
C05-149 Flutter-Margin Method Accounting for Modal Parameters Uncertainties
C05-152 Dynamic Response of Aeroservoelastic Systems to Gust Excitation
C05-146 Modeling Delta Wing Limit-Cycle Oscillations Using a High-Fidelity Structural Model
C05-059 Application of Genetic Algorithm for Aeroelastic Tailoring of a Cranked-Arrow Wing
C05-197 Modeling and Detection of Limit-Cycle Oscillations Using Adaptable Linear Models
C05-161 On the Uniqueness of the Minimum State Representation
C05-184 Approach to Induced Drag Reduction with Experimental Evaluation
C05-196 Flutter Analysis of an F-16A/B in Heavy Store Configuration
C05-099 Extension of the g-Method Flutter Solution to Aeroservoelastic Stability Analysis
C05-124 Aeroelastic Stability Enhancement and Vibration Suppression in a Composite Helicopter Rotor
C05-123 Aeroelastic Calculations for the Hawk Aircraft Using the Euler Equations
C05-067 Upper Bound Flutter Speed Estimation Using the μ-k Method
C05-107 Numerical Simulations of Membrane Wing Aerodynamics for Micro Air Vehicle Applications
C05-091 Direct Aeroelastic Bifurcation Analysis of a Symmetric Wing Based on the Euler Equations
C05-092 Control Surface Response of a Blended Wing Body Aeroelastic Wind-Tunnel Model
C05-016 Time-Dependent Coefficient Reduced-Order Model for Unsteady Aerodynamics of Proprotors
C05-020 Analysis of Proprotor Whirl Flutter: Review and Update
C05-015 Flight Characteristics of Shaping the Membrane Wing of a Micro Air Vehicle
C05-061 Aeroelastic System Development Using Proper Orthogonal Decomposition and Volterra Theory
C05-125 Numerical Investigation of Nonlinear Aeroelastic Effects on Flexible High-Aspect-Ratio Wings
C05-050 Time Domain Training Signals Comparison for Computational Fluid Dynamics Based Aerodynamic Identification
C05-031 Influence of Angle of Attack and Stabilizer Deflection on T Empennage Flutter
C05-063 Aerodynamic and Static Aeroelastic Characteristics of a Variable-Span Morphing Wing
C05-122 Reducing Conservatism in Flutterometer Predictions Using Volterra Modeling with Modal Parameter Estimation
C05-062 Elastic-Blade Whirl Flutter Stability Analysis of Two-Bladed Proprotor/Pylon Systems
C05-034 On Active Aeroelastic Control of an Adaptive Wing Using Piezoelectric Actuators

Air Transportation

C05-012 Capacity-Enhancing Air Traffic Management Concept
C05-039 Future Air Traffic Timetable Estimator
C05-096 Case for Small Supersonic Civil Aircraft
C05-044 Aerial Refueling Implications for Commercial Aviation
C05-173 Unit Cost Estimation Methodology for Commercial Aircraft
C05-111 Wake Vortex Alleviation Flow Field Studies
C05-106 Growth and Operating Patterns of Regional Jets in the United States
C05-157 Investigating Conformance Monitoring Issues in Air Traffic Control Using Fault Detection Techniques

Airframe-Propulsion Integration

C05-160 Parallel Overset-Grid Euler Solution of Generic Wing Pylon and Finned Store
C05-189 Drag Prediction of Engine-Airframe Interference Effects with CFX-5

Civil Missions and Transportation

C05-131 Some Characteristics of Supersonic Transport Trajectories

C05-044 Aerial Refueling Implications for Commercial Aviation

Communication and Air Traffic Control

C05-012 Capacity-Enhancing Air Traffic Management Concept
C05-157 Investigating Conformance Monitoring Issues in Air Traffic Control Using Fault Detection Techniques

Configuration Design

C05-097 Two Supersonic Business Aircraft Conceptual Designs With and Without Sonic Boom Constraint
C05-174 Multi-Attribute Value Approach to Business Airplane Product Assessment
C05-182 Stall Hysteresis of an Airfoil with Slotted Flap
C05-095 Design and Development of the HondaJet
C05-204 Optimum Loading of a Wing with a Slit
C05-192 Novel Taguchi-Simulated Annealing Method Applied to Airfoil and Wing Planform Optimization
C05-129 Spline-Based Airfoil Curvature Smoothing and Its Applications
C05-102 Birth of Sweepback: Related Research at Luftfahrtforschungsanstalt–Germany
C05-043 Spanwise Lift Distribution for Blended Wing Body Aircraft
C05-073 Understanding Abrupt Wing Stall with Computational Fluid Dynamics
C05-096 Case for Small Supersonic Civil Aircraft
C05-023 Incorporation of Aircraft Performance Considerations in Inverse Airfoil Design
C05-044 Aerial Refueling Implications for Commercial Aviation
C05-173 Unit Cost Estimation Methodology for Commercial Aircraft
C05-202 Inverse Design of Adaptive Airfoils with Aircraft Performance Considerations
C05-128 Thrust-Matching Requirements for the Conceptual Design of Hypersonic Waverider Vehicles
C05-066 Two Simplified Versions of Supersonic Area Rule

Deceleration Systems

C05-119 Aerodynamic Drag of Streamers and Flags
C05-148 Simultaneous-Perturbation-Stochastic-Approximation Algorithm for Parachute Parameter Estimation
C05-132 Aerodynamic Drag of Parafoils

Economics

C05-173 Unit Cost Estimation Methodology for Commercial Aircraft
C05-039 Future Air Traffic Timetable Estimator

Flight Control Integration

C05-135 Novel Hierarchical Modular Control Methodology for Closed-Loop-Flow Control Applications
C05-054 Simulation of Helicopter Shipboard Launch and Recovery with Time-Accurate Airwakes

Flight Mechanics

C05-100 Aircraft Characterization in Icing Using Flight Test Data
C05-168 Aircraft Trajectory Planning for Terrain Following Incorporating Actuator Constraints
C05-088 Evaluation of the Wright 1902 Glider Using Full-Scale Wind-Tunnel Data
C05-025 Optimum Range and Endurance of a Piston Propeller Aircraft with Cambered Wing
C05-005 Global Model Approach for X-31 VECTOR System Identification
C05-003 Application of Parameter Estimation to Improved Autogyro Simulation Model Fidelity
C05-076 Unsteady Computations of Abrupt Wing Stall Using Detached-Eddy Simulation
C05-078 Recommendations for Computational-Fluid-Dynamics Procedures for Predicting Abrupt Wing Stall
C05-008 Five-Hole Flow Probe Calibration from Dynamic and Tower Flyby Maneuvers
C05-027 Handling Qualities Analysis of the Wright Brothers' 1902 Glider
C05-017 Performance and Stability of a Winged Vehicle in Ground Effect
C05-015 Flight Characteristics of Shaping the Membrane Wing of a Micro Air Vehicle
C05-183 Constant Lift Coefficient Turns
C05-156 Range Maximization for Emergency Landing After Engine Cutoff
C05-199 Robust Match-Point Solutions Using Describing Function Method
C05-186 Aircraft Spin Recovery, with and without Thrust Vectoring, Using Nonlinear Dynamic Inversion
C05-102 Birth of Sweepback: Related Research at Luftfahrtforschungsanstalt–Germany
C05-188 Computational Study of F/A-18 E/F Abrupt Wing Stall in the Approach Configuration

Flight Operations

C05-157 Investigating Conformance Monitoring Issues in Air Traffic Control Using Fault Detection Techniques

Flow Control

C05-171 Drag Evolution of a Rectangular Wing with a Triggered Wing-Tip Separation
C05-135 Novel Hierarchical Modular Control Methodology for Closed-Loop-Flow Control Applications

Fuels and Fuel Systems

C05-024 Fuel Jet Spread Modeling for Numerical of Aircraft Fuel Dumping Simulation

General Aviation

C05-096 Case for Small Supersonic Civil Aircraft
C05-023 Incorporation of Aircraft Performance Considerations in Inverse Airfoil Design
C05-025 Optimum Range and Endurance of a Piston Propeller Aircraft with Cambered Wing
C05-201 Aircraft Structural Morphing Using Tendon-Actuated Compliant Cellular Trusses

Ground Effect Machines

C05-017 Performance and Stability of a Winged Vehicle in Ground Effect

Landing Dynamics

C05-203 Dynamic Analysis of Aircraft Landing Impact Using Landing-Region-Based Model

Lighter-Than-Air Systems

C05-205 Undesired Equilibria of Self-Deploying Pneumatic Envelopes
C05-057 Altitude Control of Long-Duration Balloons
C05-119 Aerodynamic Drag of Streamers and Flags

Micro Air Vehicles

C05-190 Effect of Tip Vortex on Wing Aerodynamics of Micro Air Vehicles
C05-191 Effect of Camber on the Aerodynamics of Adaptive-Wing Micro Air Vehicles

Military Missions

C05-040 Military Aviation and the Environment: Historical Trends and Comparison to Civil Aviation

Noise

C05-042 Near Real-Time Simulation of Rotorcraft Acoustics and Flight Dynamics
C05-086 Sensitivity of Helicopter Blade-Vortex-Interaction Noise and Vibration to Interaction Parameters

Performance

C05-025 Optimum Range and Endurance of a Piston Propeller Aircraft with Cambered Wing
C05-202 Inverse Design of Adaptive Airfoils with Aircraft Performance Considerations
C05-101 Passive Shock Control Concept for Drag Reduction in Transonic Flow
C05-017 Performance and Stability of a Winged Vehicle in Ground Effect
C05-023 Incorporation of Aircraft Performance Considerations in Inverse Airfoil Design
C05-014 Effect of Airfoil Geometry on Performance with Simulated Intercycle Ice Accretions
C05-052 Propeller Performance at Low Advance Ratio
C05-131 Some Characteristics of Supersonic Transport Trajectories
C05-144 Ideal Aerodynamics of Ground Effect and Formation Flight

C05-204 Optimum Loading of a Wing with a Slit
C05-134 Biologically Inspired Fixed-Wing Configuration Studies

Powerplant Integration

C05-029 Drag Computation and Breakdown in Power-on Conditions
C05-128 Thrust-Matching Requirements for the Conceptual Design of Hypersonic Waverider Vehicles

Propeller and Rotor Systems

C05-108 Effect of Unsteady Blade Pitching Motion on Aerodynamic Performance of Microrotorcraft
C05-068 Effect of Miniaturized Gurney Flaps on Aerodynamic Performance of Microscale Rotors
C05-052 Propeller Performance at Low Advance Ratio
C05-020 Analysis of Proprotor Whirl Flutter: Review and Update
C05-016 Time-Dependent Coefficient Reduced-Order Model for Unsteady Aerodynamics of Proprotors
C05-026 Wright Brothers' Invention of 1903 Propeller and Genesis of Modern Propeller Theory

Rotorcraft

C05-003 Application of Parameter Estimation to Improved Autogyro Simulation Model Fidelity
C05-062 Elastic-Blade Whirl Flutter Stability Analysis of Two-Bladed Proprotor/Pylon Systems
C05-020 Analysis of Proprotor Whirl Flutter: Review and Update
C05-068 Effect of Miniaturized Gurney Flaps on Aerodynamic Performance of Microscale Rotors
C05-108 Effect of Unsteady Blade Pitching Motion on Aerodynamic Performance of Microrotorcraft
C05-124 Aeroelastic Stability Enhancement and Vibration Suppression in a Composite Helicopter Rotor
C05-042 Near Real-Time Simulation of Rotorcraft Acoustics and Flight Dynamics
C05-086 Sensitivity of Helicopter Blade-Vortex-Interaction Noise and Vibration to Interaction Parameters
C05-054 Simulation of Helicopter Shipboard Launch and Recovery with Time-Accurate Airwakes
C05-195 Analysis of Model Rotor Blade Pressures During Parallel Interaction with Twin Vortices
C05-071 Maximization of Thrust-Torque Ratio of a Coaxial Rotor
C05-147 Assessment of Comprehensive Analysis Calculation of Airloads on Helicopter Rotors

Safety

C05-113 Comparison of Wake-Vortex Parameters Measured by Pulsed and Continuous-Wave Lidars
C05-176 Observations from the Inspection of an Aged Fuselage Panel
C05-114 Flight-Simulator Study of Airplane Encounters with Perturbed Trailing Vortices
C05-032 Bonded Composite Patch Design for Aircraft Structures Exhibiting Cracking and Corrosion

Simulation

C05-037 History of In-Flight Simulation at General Dynamics
C05-033 Finite Element Model Updating Using Bayesian Framework and Modal Properties
C05-027 Handling Qualities Analysis of the Wright Brothers' 1902 Glider
C05-078 Recommendations for Computational-Fluid-Dynamics Procedures for Predicting Abrupt Wing Stall
C05-039 Future Air Traffic Timetable Estimator
C05-088 Evaluation of the Wright 1902 Glider Using Full-Scale Wind-Tunnel Data
C05-116 Modeling of Aerodynamic Coupling Between Aircraft in Close Proximity
C05-041 Simulation of Aircraft Response to Control Surface Deflection Using Unstructured Dynamic Grids

Stealth

C05-072 Finite Volume Time-Domain Computations for Electromagnetic Scattering from Intake Configurations
C05-127 Effect of Atmospheric Transmission and Radiance on Aircraft Infared Signatures
C05-105 Multistage Trajectory Optimization with Radar Range Constraints

Structural Design (Including Loads)

C05-164 Subsonic Aircraft Design Optimization with Neural Network and Regression Approximators
C05-175 Knowledge Based Engineering System to Estimate Manufacturing Cost for Composite Structures
C05-103 Evolution of Structures Design Philosophy and Criteria
C05-093 Computationally Efficient Analysis and Optimization of Stiffened Thin-Walled Panels in Shear
C05-201 Aircraft Structural Morphing Using Tendon-Actuated Compliant Cellular Trusses
C05-200 Parametric Modeling of Movables for Structural Analysis

Structural Materials

C05-154 Analysis of the Cold-Working Process on Holes Containing Preexisting Cracks
C05-176 Observations from the Inspection of an Aged Fuselage Panel

Testing, Flight and Ground

C05-178 Movable Tip Strakes and Wing Aerodynamics
C05-100 Aircraft Characterization in Icing Using Flight Test Data
C05-005 Global Model Approach for X-31 VECTOR System Identification
C05-120 Sting Effects on Store Captive Loads
C05-037 History of In-Flight Simulation at General Dynamics
C05-008 Five-Hole Flow Probe Calibration from Dynamic and Tower Flyby Maneuvers
C05-092 Control Surface Response of a Blended Wing Body Aeroelastic Wind-Tunnel Model
C05-009 Flight-Test Estimation of Aircraft Aerodynamic Characteristics—Russian Experience
C05-078 Recommendations for Computational-Fluid-Dynamics Procedures for Predicting Abrupt Wing Stall
C05-001 Application of System Identification to Aircraft at NASA Langley Research Center
C05-122 Reducing Conservatism in Flutterometer Predictions Using Volterra Modeling with Modal Parameter Estimation
C05-002 Nonlinear Aerodynamic Model Extraction from Flight-Test Data for the S-3B Viking
C05-079 Flight Test Assessment of Lateral Activity
C05-149 Flutter-Margin Method Accounting for Modal Parameters Uncertainties
C05-166 New Blockage-Correction Method for Separated Flows in a Subsonic Wind Tunnel
C05-132 Aerodynamic Drag of Parafoils
C05-095 Design and Development of the HondaJet
C05-170 Wing Tip Vortex in the Near Field: An Experimental Study
C05-182 Stall Hysteresis of an Airfoil with Slotted Flap
C05-193 In-Flight Thrust Measurements of Propeller-Driven Airplanes

Uninhabited and Unmanned Air Vehicles

C05-201 Aircraft Structural Morphing Using Tendon-Actuated Compliant Cellular Trusses
C05-134 Biologically Inspired Fixed-Wing Configuration Studies

Vibration

C05-147 Assessment of Comprehensive Analysis Calculation of Airloads on Helicopter Rotors
C05-155 Biodynamic Response Mitigation to Shock Loads Using Magnetorheological Helicopter Crew Seat Suspensions
C05-065 Analysis of Bending Vibration of Rectangular Plates Using Two-Dimensional Plate Modes
C05-033 Finite Element Model Updating Using Bayesian Framework and Modal Properties
C05-150 Semi-Active Vibration Isolation Using Magnetorheological Isolators
C05-086 Sensitivity of Helicopter Blade-Vortex-Interaction Noise and Vibration to Interaction Parameters

Weather Hazards

C05-014 Effect of Airfoil Geometry on Performance with Simulated Intercycle Ice Accretions

COMPUTING, INFORMATION, AND COMMUNICATION

Digital Avionics Systems

C05-193 In-Flight Thrust Measurements of Propeller-Driven Airplanes

FLUID DYNAMICS

Aeroacoustics

C05-042 Near Real-Time Simulation of Rotorcraft Acoustics and Flight Dynamics

Boundary Layers and Heat Transfer-Turbulent

C05-019 Separated Shock–Boundary-Layer Interaction Control Using Streamwise Slots

Boundary-Layer Stability and Transition

C05-141 Automatic Transition Prediction and Application to High-Lift Multi-Element Configurations
C05-069 Near Wake Behind an Airfoil with Leading-Edge Flow Control
C05-169 Automatic Transition Prediction for High-Lift Systems Using a Hybrid Flow Solver
C05-206 Aerodynamic Characteristics of an Elliptic Airfoil at Low Reynolds Number

Computational Fluid Dynamics

C05-189 Drag Prediction of Engine-Airframe Interference Effects with CFX-5
C05-172 Deforming Grid Technique Applied to Unsteady Viscous Flow Simulation by a Fully Implicit Solver
C05-185 Vortex-Generator Model and Its Application to Flow Control
C05-160 Parallel Overset-Grid Euler Solution of Generic Wing Pylon and Finned Store
C05-181 Detached Eddy Simulations for Iced Airfoils
C05-058 High-Reynolds Number Viscous Flow Computations Using an Unstructured-Grid Method
C05-041 Simulation of Aircraft Response to Control Surface Deflection Using Unstructured Dynamic Grids
C05-142 Data Summary from Second AIAA Computational Fluid Dynamics Drag Prediction Workshop
C05-169 Automatic Transition Prediction for High-Lift Systems Using a Hybrid Flow Solver
C05-115 Airbus, ONERA, and DLR Results from the Second AIAA Drag Prediction Workshop
C05-054 Simulation of Helicopter Shipboard Launch and Recovery with Time-Accurate Airwakes
C05-141 Automatic Transition Prediction and Application to High-Lift Multi-Element Configurations
C05-137 Modified Shear-Stress Transport Turbulence Model for Supersonic Flows
C05-047 Inviscid Effects of Thin Shear Layers on Four Vortex Systems
C05-029 Drag Computation and Breakdown in Power-On Conditions
C05-110 Transonic Drag Prediction Using an Unstructured Multigrid Solver
C05-118 Scalable Computational Steering for Visualization/Control of Large-Scale Fluid Dynamics Simulations
C05-123 Aeroelastic Calculations for the Hawk Aircraft Using the Euler Equations
C05-070 Inverse Design of Transonic Airfoils Using Parallel Simultaneous Perturbation Stochastic Approximation
C05-048 Condensation on ONERA M6 and F-16 Wings in Atmospheric Flight: Numerical Modeling
C05-024 Fuel Jet Spread Modeling for Numerical of Aircraft Fuel Dumping Simulation
C05-091 Direct Aeroelastic Bifurcation Analysis of a Symmetric Wing Based on the Euler Equations
C05-022 Wind-Tunnel Interference Effects on Delta Wing Aerodynamics Computational Fluid Dynamics Investigation
C05-061 Aeroelastic System Development Using Proper Orthogonal Decomposition and Volterra Theory
C05-085 Simulating the Aerodynamics of the NASA John H. Glenn Icing Research Tunnel
C05-055 Computations with k-g Model for Complex Configurations at High-Incidence
C05-021 Implementation and Validation of the Spalart–Allmaras Turbulence Model in Parallel Environment
C05-050 Time Domain Training Signals Comparison for Computational Fluid Dynamics Based Aerodynamic Identification
C05-125 Numerical Investigation of Nonlinear Aeroelastic Effects on Flexible High-Aspect-Ratio Wings
C05-030 Parametric Studies of Transonic Aeroelastic Effects of an Aircraft Wing/Tip Store
C05-077 F/A-18C to £ Wing Morphing Study for the Abrupt-Wing-Stall Program
C05-075 Computational Study of the Abrupt-Wing-Stall Characteristics of F/A-18E and F-16C

Hypersonic Flow

C05-165 Shock-Based Waverider Design with Pressure Gradient Corrections and Computational Simulations

Jets, Wakes, and Viscid-Inviscid Flow Interactions

C05-143 Measurements of Wake Vortices Interacting with the Ground
C05-024 Fuel Jet Spread Modeling for Numerical of Aircraft Fuel Dumping Simulation

Multiphase Flows

C05-048 Condensation on ONERA M6 and F-16 Wings in Atmospheric Flight: Numerical Modeling
C05-085 Simulating the Aerodynamics of the NASA John H. Glenn Icing Research Tunnel

Separated Flows

C05-055 Computations with k-g Model for Complex Configurations at High-Incidence
C05-087 Delta Wing Stall and Roll Control Using Segmented Piezoelectric Fluidic Actuators
C05-107 Numerical Simulations of Membrane Wing Aerodynamics for Micro Air Vehicle Applications
C05-077 F/A-18C to E Wing Morphing Study for the Abrupt-Wing-Stall Program
C05-076 Unsteady Computations of Abrupt Wing Stall Using Detached-Eddy Simulation
C05-137 Modified Shear-Stress Transport Turbulence Model for Supersonic Flows
C05-140 Active Control of Flow Separation from Supercritical Airfoil Leading-Edge Flap Shoulder
C05-083 Text Mining the Global Abrupt-Wing-Stall Literature
C05-166 New Blockage-Correction Method for Separated Flows in a Subsonic Wind Tunnel

Shock Waves and Detonations

C05-165 Shock-Based Waverider Design with Pressure Gradient Corrections and Computational Simulations
C05-019 Separated Shock–Boundary-Layer Interaction Control Using Streamwise Slots

Subsonic Flow

C05-035 Effects of Synthetic Jets on Large Amplitude Sinusoidal Pitch Motions
C05-206 Aerodynamic Characteristics of an Elliptic Airfoil at Low Reynolds Number
C05-179 Off-Design Reynolds Number Effects for a Supersonic Transport
C05-098 Inviscid Wing-Tip Vortex Behavior Behind Wings in Close Formation Flight

Supersonic Flow

C05-066 Two Simplified Versions of Supersonic Area Rule

Transonic Flow

C05-123 Aeroelastic Calculations for the Hawk Aircraft Using the Euler Equations
C05-110 Transonic Drag Prediction Using an Unstructured Multigrid Solver
C05-101 Passive Shock Control Concept for Drag Reduction in Transonic Flow
C05-019 Separated Shock–Boundary-Layer Interaction Control Using Streamwise Slots
C05-048 Condensation on ONERA M6 and F-16 Wings in Atmospheric Flight: Numerical Modeling
C05-076 Unsteady Computations of Abrupt Wing Stall Using Detached-Eddy Simulation
C05-075 Computational Study of the Abrupt-Wing-Stall Characteristics of F/A-18E and F-16C
C05-030 Parametric Studies of Transonic Aeroelastic Effects of an Aircraft Wing/Tip Store
C05-021 Implementation and Validation of the Spalart–Allmaras Turbulence Model in Parallel Environment

C05-043 Spanwise Lift Distribution for Blended Wing Body Aircraft
C05-160 Parallel Overset-Grid Euler Solution of Generic Wing Pylon and Finned Store
C05-179 Off-Design Reynolds Number Effects for a Supersonic Transport
C05-083 Text Mining the Global Abrupt-Wing-Stall Literature

Unsteady Flows

C05-181 Detached Eddy Simulations for Iced Airfoils
C05-172 Deforming Grid Technique Applied to Unsteady Viscous Flow Simulation by a Fully Implicit Solver

Chronological Index

C04-119 High-Order vs Low-Order Panel Methods for Unsteady Subsonic Lifting Surfaces. Ping Chih Chen, Danny D. Liu, and Darius Sarhaddi, *ZONA Technology, Inc.* (**41**, 4, p. 957) Technical Note

Technical Comment by William P. Rodden (**42**, 2, p. 575)

C04-174 Aerodynamic Interference of a Large and a Small Aircraft. Reza Karkehabadi, *Virginia Polytechnic Institute and State University* (**41**, 6, p. 1424) Article

Errata (**42**, 2, p. 576)

C05-001 Application of System Identification to Aircraft at NASA Langley Research Center. Eugene A. Morelli, *NASA Langley Research Center*; and Vladislav Klein, *George Washington University* (**42**, 1, p. 12) Article

C05-002 Nonlinear Aerodynamic Model Extraction from Flight-Test Data for the S-3B Viking. Alfonso C. Paris and Omeed Alaverdi, *Science Applications International Corporation* (**42**, 1, p. 26) Article based on AIAA Paper 2001-4015

C05-003 Application of Parameter Estimation to Improved Autogyro Simulation Model Fidelity. Douglas G. Thomson and Stewart S. Houston, *University of Glasgow, Great Britain* (**42**, 1, p. 33) Article

C05-004 Parameter Estimation in Nonlinear Systems Using Hopfield Neural Networks. Zhenning Hu and Sivasubramanya N. Balakrishnan, *University of Missouri–Rolla* (**42**, 1, p. 41) Article

C05-005 Global Model Approach for X-31 VECTOR System Identification. Detlef Rohlf, *DLR, German Aerospace Research Center, Germany* (**42**, 1, p. 54) Article

C05-006 System Identification for Retrofit Reconfigurable Control of an F/A-18 Aircraft. David G. Ward and Jeffrey F. Monaco, *Barron Associates, Inc.* (**42**, 1, p. 63) Article

C05-007 Advances in Real-Time Aerodynamic Model Identification. Kenneth Hui, Lorenzo Auriti, and Joseph Ricciardi, *National Research Council, Canada* (**42**, 1, p. 73) Article

C05-008 Five-Hole Flow Probe Calibration from Dynamic and Tower Flyby Maneuvers. V. Parameswaran, *National Aerospace Laboratories, India*; Ravindra Jategaonkar and Michael Press, *DLR, German Aerospace Center, Germany* (**42**, 1, p. 80) Article based on AIAA Paper 2002-4627

C05-009 Flight-Test Estimation of Aircraft Aerodynamic Characteristics—Russian Experience. Yu. I. Sneshko, V. N. Chetvergov, and T. A. Chernysheva, *Gromov Flight Research Institute, Russia* (**42**, 1, p. 87) Technical Note

C05-010 In-Flight Structural Modes Identification for Comfort Improvement by Flight Control Laws. Christophe Le Garrec and François Kubica, *Airbus Industries, France* (**42**, 1, p. 90) Technical Note based on AIAA Paper 2003-5536

C05-011 Design of an Aerolevitation Electric Vehicle for High-Speed Ground Transportation System. Cheolheui Han and Jinsoo Cho, *Hanyang University, South Korea*; Youngjune Moon, *Korea University, South Korea*; Yonghyun Yoon, *Korea Airforce Academy, South Korea*; and Yongkyu Song, *Hankuk Aviation University, South Korea* (**42**, 1, p. 93) Article based on AIAA Paper 2002-5829

C05-012 Capacity-Enhancing Air Traffic Management Concept. Alvin L. Sipe, Robert Schwab, Aslaug Haraldsdottir, and Ewald G. Schoemig, Marissa K. Singleton, Paul van Tulder, Monica Alcabin, Steven H. Glickman, and Arek Shakarian, *The Boeing Company* (**42**, 1, p. 105) Article based on AIAA Paper 2003-2666

C05-013 Characteristics of Y-Shaped Rectangular Diffusing Duct at Different Inflow Conditions. Titiksh Patel, S. N. Singh, and V. Seshadri, *Indian Institute of Technology, Delhi, India* (**42**, 1, p. 113) Article

C05-014 Effect of Airfoil Geometry on Performance with Simulated Intercycle Ice Accretions. Andy P. Broeren and Michael B. Bragg, *University of Illinois at Urbana–Champaign* (**42**, 1, p. 121) Article based on AIAA Paper 2003-0728

C05-015 Flight Characteristics of Shaping the Membrane Wing of a Micro Air Vehicle. Mujahid Abdulrahim, Helen Garcia, and Rick Lind, *University of Florida* (**42**, 1, p. 131) Article

C05-016 Time-Dependent Coefficient Reduced-Order Model for Unsteady Aerodynamics of Proprotors. Massimo Gennaretti and Luca Greco, *University of Rome, Italy* (**42**, 1, p. 138) Article

C05-017 Performance and Stability of a Winged Vehicle in Ground Effect. Nicola de Divitiis, *University of Rome "La Sapienza," Italy* (**42**, 1, p. 148) Article

C05-018 Huygens Structure Atmospheric Instrument 2002 Balloon Campaign: Probe–Parachute System Attitude Analysis. Vincent Gaborit, *LESIA, Observatory of Paris-Meudon, France*; M. Antonello and G. Colombatti, *University of Padua, Italy*; and M. Fulchignoni, *Universite Denis Diderot/LESIA, Observatory of Paris–Meudon, France* (**42**, 1, p. 158) Article

C05-019 Separated Shock–Boundary-Layer Interaction Control Using Streamwise Slots. Harriet A. Holden and Holger Babinsky, *Cambridge University, Great Britain* (**42**, 1, p. 166) Article

C05-020 Analysis of Proprotor Whirl Flutter: Review and Update. Donald L. Kunz, *U.S. Air Force Institute of Technology* (**42**, 1, p. 172) Article based on AIAA Paper 2002-1602

C05-021 Implementation and Validation of the Spalart–Allmaras Turbulence Model in Parallel Environment. Stephane Seror, Theodor Rubin, and Sergey Peigin, *Israel Aircraft Industries, Israel*; and Boris Epstein, *The Academic College Tel-Aviv-Yaffo, Israel* (**42**, 1, p. 179) Article based on AIAA Paper 2003-3404

C05-022 Wind-Tunnel Interference Effects on Delta Wing Aerodynamics Computational Fluid Dynamics Investigation. Mark R. Allan, Ken J. Badcock, George N. Barakos, and Bryan E. Richards, *University of Glasgow, Great Britain* (**42**, 1, p. 189) Article based on AIAA Paper 2003-4214

C05-023 Incorporation of Aircraft Performance Considerations in Inverse Airfoil Design. Jeffrey K. Jepson and Ashok Gopalarathnam, *North Carolina State University* (**42**, 1, p. 199) Article based on AIAA Paper 2003-3499

C05-024 Fuel Jet Spread Modeling for Numerical of Aircraft Fuel Dumping Simulation. Tsze C. Tai, *U.S. Naval Surface Warfare Center* (**42**, 1, p. 208) Article based on AIAA Paper 2003-3929

C05-025 Optimum Range and Endurance of a Piston Propeller Aircraft with Cambered Wing. Mustafa Cavcar and Aydan Cavcar, *Anadolu University, Turkey* (**42**, 1, p. 212) Article

C05-026 Wright Brothers' Invention of 1903 Propeller and Genesis of Modern Propeller Theory. Trent J. Carroll, *Eye Physicans of Springfield*; and Thomas R. Carroll, *National Oceanic and Atmospheric Administration* (**42**, 1, p. 218) Article

C05-027 Handling Qualities Analysis of the Wright Brothers' 1902 Glider. Ben Lawrence and Gareth D. Padfield, *University of Liverpool, Great Britain* (**42**, 1, p. 224) Article based on AIAA Paper 2003-5307

C05-028 Large-Area Aerodynamic Control for High-Altitude Long-Endurance Sensor Platforms. Gregory W. Reich, Jason C. Bowman, and Brian Sanders, *U.S. Air Force Research Laboratory* (**42**, 1, p. 237) Article

C05-029 Drag Computation and Breakdown in Power-On Conditions. Renato Tognaccini, *University of Naples "Federico II," Italy* (**42**, 1, p. 245) Article

C05-030 Parametric Studies of Transonic Aeroelastic Effects of an Aircraft Wing/Tip Store. Srinivasan Janardhan and Ramana V. Grandhi, *Wright State University*; Frank Eastep and Brian Sanders, *U.S. Air Force Research Laboratory* (**42**, 1, p. 253) Article

C05-031 Influence of Angle of Attack and Stabilizer Deflection on T Empennage Flutter. Vitaly D. Chuban, *TsAGI, Russia* (**42**, 1, p. 264) Article

C05-032 Bonded Composite Patch Design for Aircraft Structures Exhibiting Cracking and Corrosion. Madhukar Singh and William Schonberg, *University of Missouri–Rolla* (**42**, 1, p. 269) Article

C05-033 Finite Element Model Updating Using Bayesian Framework and Modal Properties. Tshilidzi Marwala, *University of Witwatersrand, South Africa*; and Sibusiso Sibisi, *Council for Scientific and Industrial Research, South Africa* (**42**, 1, p. 275) Technical Note

C05-034 On Active Aeroelastic Control of an Adaptive Wing Using Piezoelectric Actuators. J. Rocha, P. A. Moniz, Antonio P. Costa, and Afzal Suleman, *Academia da Forca Aerea, Portugal* (**42**, 1, p. 278) Technical Note based on AIAA Paper 2001-1361

C05-035 Effects of Synthetic Jets on Large Amplitude Sinusoidal Pitch Motions. Lance W. Traub, Adam C. Miller, Othon Rediniotis, Kiwhan Kim, and Suhada Jayasuriya, *Texas A&M University*; and Gyuhong Jung, *Daejin University* (**42**, 1, p. 282) Technical Note

C05-036 Extension of Flutter Prediction Parameter for Multimode Flutter Systems. Jae-Sung Bae, *Virginia Polytechnic Institute and State University*, Jong-Yun Kim and In Lee, *Korea Advanced Institute of Science and Technology, South Korea*; Yuji Matsuzaki, *Nagoya University, Japan*; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**42**, 1, p. 285) Technical Note

C05-037 History of In-Flight Simulation at General Dynamics. Norman C. Weingarten, *General Dynamics–Advanced Information Systems* (**42**, 2, p. 290) History of Key Technologies based on AIAA Paper 2003-5464

C05-038 Review of Unsteady Vortex Flows over Slender Delta Wings. Ismet Gursul, *University of Bath, Great Britain* (**42**, 2, p. 299) Survey Paper based on AIAA Paper 2003-3942

C05-039 Future Air Traffic Timetable Estimator. Dipasis Bhadra, Jennifer Gentry, Brendan Hogan, and Micheal Wells, *The MITRE Corporation* (**42**, 2, p. 320) Article

C05-040 Military Aviation and the Environment: Historical Trends and Comparison to Civil Aviation. Ian A. Waitz, Stephen P. Lukachko, and Joosung J. Lee, *Massachusetts Institute of Technology* (**42**, 2, p. 329) Article based on AIAA Paper 2003-2620

C05-041 Simulation of Aircraft Response to Control Surface Deflection Using Unstructured Dynamic Grids. Mitsuhiro Murayama, Fumiya Togashi, Kazuhiro Nakahashi, Kisa Matsushima, and Takuma Kato, *Tohoku University, Japan* (**42**, 2, p. 340) Article based on AIAA Paper 2002-2940

C05-042 Near Real-Time Simulation of Rotorcraft Acoustics and Flight Dynamics. Kenneth S. Brentner, Leonard V. Lopes, Hsuan-Nien Chen, and Joseph F. Horn, *The Pennsylvania State University* (**42**, 2, p. 347) Article

C05-043 Spanwise Lift Distribution for Blended Wing Body Aircraft. Ning Qin, *University of Sheffield, Great Britain*; Amando Vavalle, *Cranfield University, Great Britain*; and Alan Le Moigne, *University of Sheffield, Great Britain* (**42**, 2, p. 356) Article

C05-044 Aerial Refueling Implications for Commercial Aviation. Matthew A. Bennington and Kenneth D. Visser, *Clarkson University* (**42**, 2, p. 366) Article

C05-045 Airfoil Pitch-and-Plunge Bifurcation Behavior with Fourier Chaos Expansions. Daniel R. Millman and Paul I. King, *Air Force Institute of Technology*; and Philip S. Beran, *U.S. Air Force Research Laboratory* (**42**, 2, p. 376) Article based on AIAA Paper 2003-3515

C05-046 Flow Visualization of Micro Air Vehicle Scaled Insect-Based Flapping Wings. Matthew J. Tarascio, Manikandan Ramasamy, Inderjit Chopra, and J. G. Leishman, *University of Maryland* (**42**, 2, p. 385) Article

C05-047 Inviscid Effects of Thin Shear Layers on Four Vortex Systems. Simon J. Hubbard and Andrew J. Marquis, *Imperial College of Science, Technology, and Medicine, Great Britain* (**42**, 2, p. 391) Article

C05-048 Condensation on ONERA M6 and F-16 Wings in Atmospheric Flight: Numerical Modeling. Kevin A. Goodheart and Guenter H. Schnerr, *Technical University of Munich, Germany* (**42**, 2, p. 402) Article

C05-049 Efficient Optimization Design Method Using Kriging Model. Shinkyu Jeong, Mitsuhiro Murayama, and Kazuomi Yamamoto, *Japan Aerospace Exploration Agency, Japan* (**42**, 2, p. 413) Article based on AIAA Paper 2004-0118
Errata (**42**, 5, p. 1375)

C05-050 Time Domain Training Signals Comparison for Computational Fluid Dynamics Based Aerodynamic Identification. Charles R. O'Neill and Andrew S. Arena, *Oklahoma State University* (**42**, 2, p. 421) Article based on AIAA Paper 2004-0209

C05-051 Unsteady Trailing Vortex Evolution Behind a Wing In Ground Effect. Jinsoo Cho and Cheolheui Han, *Hanyang University, South Korea* (**42**, 2, p. 429) Article

C05-052 Propeller Performance at Low Advance Ratio. Rosen Aviv and Ohad Gur, *Technion—Israel Institute of Technology, Israel* (**42**, 2, p. 435) Article

C05-053 Effect of Trailing-Edge Flap on a Tip Vortex. David M. Birch and Tim Lee, *McGill University, Canada* (**42**, 2, p. 442) Article

C05-054 Simulation of Helicopter Shipboard Launch and Recovery with Time-Accurate Airwakes. Dooyong Lee, Nilay Sezer-Uzol, Joseph F. Horn, and Lyle N. Long, *Pennsylvania State University* (**42**, 2, p. 448) Article

C05-055 Computations with k-g Model for Complex Configurations at High-Incidence. Zhixiang Xiao, Haixin Chen, and Song Fu, *Tsinghua University, China (PRC)*; and Fengwei LI, *Northwestern Polytechnical University, China (PRC)* (**42**, 2, p. 462) Article based on AIAA Paper 2004-0899

C05-056 Autonomous Coordination of Aircraft Formations Using Direct and Nearest-Neighbor Approaches. Larry M. Silverberg and Blaine A. Levedahl, *North Carolina State University* (**42**, 2, p. 469) Article

C05-057 Altitude Control of Long-Duration Balloons. Paul B. Voss and Emily E. Riddle, *University of Massachusetts*; and Mike Smith, *Raven Industries* (**42**, 2, p. 478) Article based on AIAA Paper 2003-6819

C05-058 High-Reynolds Number Viscous Flow Computations Using an Unstructured-Grid Method. Hong Luo, and Joseph D. Baum, *Science Applications International Corporation*; and Rainald Lohner, *George Mason University* (**42**, 2, p. 483) Article based on AIAA Paper 2004-1103

C05-059 Application of Genetic Algorithm for Aeroelastic Tailoring of a Cranked-Arrow Wing. Hitoshi Arizono, *Japan Aerospace Exploration Agency, Japan*; and Koji Isogai, *Nippon Bunri University, Japan* (**42**, 2, p. 493) Article

C05-060 In-Flight Wing Deformation Characteristics During Limit Cycle Oscillations. Charles M. Denegri, James A. Dubben, and Daniel L. Maxwell, *U.S. Air Force SEEK EAGLE Office* (**42**, 2, p. 500) Article based on AIAA Paper 2003-1426

C05-061 Aeroelastic System Development Using Proper Orthogonal Decomposition and Volterra Theory. David J. Lucia and Philip S. Beran, *U.S. Air Force Research Laboratory*; and Walter A. Silva, *NASA Langley Research Center* (**42**, 2, p. 509) Article based on AIAA Paper 2003-1922

C05-062 Elastic-Blade Whirl Flutter Stability Analysis of Two-Bladed Proprotor/Pylon Systems. Beerinder Singh and Inderjit Chopra, *University of Maryland* (**42**, 2, p. 519) Article based on AIAA Paper 2003-1788

C05-063 Aerodynamic and Static Aeroelastic Characteristics of a Variable-Span Morphing Wing. Jae-Sung Bae, T. Michael Seigler and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**42**, 2, p. 528) Article

C05-064 Link-Up Strength of 2524-T3 and 2024-T3 Aluminum Panels with Multiple Site Damage. Bert L. Smith, Tanya L. Flores, and Ala L. Hijazi, *Wichita State University* (**42**, 2, p. 535) Article

C05-065 Analysis of Bending Vibration of Rectangular Plates Using Two-Dimensional Plate Modes. Gang Wang and Norman M. Wereley, *University of Maryland*; and Der-Chen Chang, *Georgetown University* (**42**, 2, p. 542) Article based on AIAA Paper 2003-1774

C05-066 Two Simplified Versions of Supersonic Area Rule. Vojin R. Nikolic, *Minnesota State University*; and Eric J. Jumper, *University of Notre Dame* (**42**, 2, p. 551) Technical Note

C05-067 Upper Bound Flutter Speed Estimation Using the μ-k Method. Dan Borglund, *Royal Institute of Technology, Sweden* (**42**, 2, p. 555) Technical Note

C05-068 Effect of Miniaturized Gurney Flaps on Aerodynamic Performance of Microscale Rotors. Jeremy Nelson and Nikhil Koratkar, *Rensselaer Polytechnic Institute* (**42**, 2, p. 557) Technical Note

C05-069 Near Wake Behind an Airfoil with Leading-Edge Flow Control. Peter Gerontakos and Tim Lee, *McGill University, Canada* (**42**, 2, p. 561) Technical Note

C05-070 Inverse Design of Transonic Airfoils Using Parallel Simultaneous Perturbation Stochastic Approximation. X. Xing and M. Damodaran, *Nanyang Technological University, Singapore* (**42**, 2, p. 568) Technical Note

C05-071 Maximization of Thrust-Torque Ratio of a Coaxial Rotor. Shigeru Sunada, Kohji Tanaka, and Kenta Kawashima, *Osaka Prefecture University, Japan* (**42**, 2, p. 570) Technical Note

C05-072 Finite Volume Time-Domain Computations for Electromagnetic Scattering from Intake Configurations. Ashim Bhattacharya and Avijit Chatterjee, *Indian Institute of Technology, Bombay, India* (**42**, 2, p. 572) Technical Note

C05-073 Understanding Abrupt Wing Stall with Computational Fluid Dynamics. Shawn H. Woodson, Brad E. Green, James J. Chung, and Darren V. Grove, *U.S. Naval Air Systems Command*; Paresh C. Parikh, *NASA Langley Research Center*; and James R. Forsythe, *U.S. Air Force Academy* (**42**, 3, p. 578) Article based on AIAA Paper 2003-0592

C05-074 Transonic Experimental Observations of Abrupt Wing Stall on an F/A-18E Model. S. N. McMillin, Robert M. Hall, and John E. Lamar, *NASA Langley Research Center* (**42**, 3, p. 586) Article based on AIAA Paper 2003-0591

C05-075 Computational Study of the Abrupt-Wing-Stall Characteristics of F/A-18E and F-16C. Paresh Parikh, *NASA Langley Research Center*; and James Chung, *U.S. Naval Air Systems Command* (**42**, 3, p. 600) Article based on AIAA Paper 2003-0746

C05-076 Unsteady Computations of Abrupt Wing Stall Using Detached-Eddy Simulation. James R. Forsythe, *U.S. Air Force Academy*; and Shawn H. Woodson, *U.S. Naval Air Systems Command* (**42**, 3, p. 606) Article based on AIAA Paper 2003-0594

C05-077 F/A-18C to E Wing Morphing Study for the Abrupt-Wing-Stall Program. Bradford E. Green, *U.S. Naval Air Systems Command*; and James D. Ott, *Combustion Research and Flow Technology, Inc.* (**42**, 3, p. 617) Article based on AIAA Paper 2003-0925

C05-078 Recommendations for Computational-Fluid-Dynamics Procedures for Predicting Abrupt Wing Stall. Shawn H. Woodson, Brad E. Green, James J. Chung, and Darren V. Grove, *U.S. Naval Air Systems Command*; Paresh C. Parikh, *NASA Langley Research Center*; and James R. Forsythe, *U.S. Air Force Academy* (**42**, 3, p. 627) Article based on AIAA Paper 2003-0923

C05-079 Flight Test Assessment of Lateral Activity. Michael T. Roesch and Brian E. Randall, *The Boeing Company* (**42**, 3, p. 634) Article based on AIAA Paper 2003-0748

C05-080 Use of Piloted Simulation for Evaluation of Abrupt-Wing-Stall Characteristics. Alexander Kokolios and Stephen P. Cook, *U.S. Naval Air Systems Command*; and Robert Niewoehner, *U.S. Naval Academy* (**42**, 3, p. 641) Article based on AIAA Paper 2003-0924

C05-081 Integrated Approach to Assessment of Transonic Abrupt Wing Stall for Advanced Aircraft. Stephen P. Cook, Alex Kokolios, and Anthony Page, *U.S. Naval Air Systems Command*; Joseph Chambers, *Ball Corporation*; Robert Niewoehner, *U.S. Naval Academy*; D. B. Owens, *NASA Langley Research Center*; and Michael Roesch, *The Boeing Company* (**42**, 3, p. 646) Article based on AIAA Paper 2003-0926

C05-082 Accomplishments of the Abrupt-Wing-Stall Program. Robert M. Hall, *NASA Langley Research Center*; Shawn H. Woodson, *U.S. Naval Air Systems Command*; and Joseph R. Chambers, *Ball Aerospace* (**42**, 3, p. 653) Article based on AIAA Paper 2003-0927

C05-083 Text Mining the Global Abrupt-Wing-Stall Literature. Ronald N. Kostoff, *Office of Naval Research*; Gabriel Karpouzian, *U.S. Naval Academy*; and Guido Malpohl, *University of Karlsruhe* (**42**, 3, p. 661) Article

C05-084 Numerical Heat Transfer Correlation for Array of Hot-Air Jets Impinging on 3-Dimensional Concave Surface. Mathieu Fregeau, Farooq Saeed, Ion Paraschivoiu, *Ecole Polytechnique de Montreal, Canada* (**42**, 3, p. 665) Article based on AIAA Paper 2003-3403

C05-085 Simulating the Aerodynamics of the NASA John H. Glenn Icing Research Tunnel. Chirag Bhargava and Eric Loth, *University of Illinois at Urbana–Champaign*; and Mark Potapczuk, *NASA John H. Glenn Research Center at Lewis Field* (**42**, 3, p. 671) Article based on AIAA Paper 2003-566

C05-086 Sensitivity of Helicopter Blade-Vortex-Interaction Noise and Vibration to Interaction Parameters. Brendon Malovrh and Farhan Gandhi, *The Pennsylvania State University* (**42**, 3, p. 685) Article

C05-087 Delta Wing Stall and Roll Control Using Segmented Piezoelectric Fluidic Actuators. Shaul Margalit, David Greenblatt, Avi Seifert, and Israel Wygnanski, *Tel-Aviv University, Israel* (**42**, 3, p. 698) Article based on AIAA Paper 2002-3270

C05-088 Evaluation of the Wright 1902 Glider Using Full-Scale Wind-Tunnel Data. Kevin Kochersberger, *Rochester Institute of Technology*; Drew Landman, *Old Dominion University*; J. L. Player, *Bihrle Applied Research*; and Ken W. Hyde, *The Wright Experience* (**42**, 3, p. 710) Article based on AIAA Paper 2003-0096

C05-089 New Pair of Leading-Edge Vortex Structure for Flow over Delta Wing. Jinjun Wang and Jingxia Zhan, *Beijing University of Aeronautics and Astronautics, China (PRC)* (**42**, 3, p. 718) Article

C05-090 Study of Four-Vortex Aircraft Wakes and Layout of Corresponding Aircraft Configurations. Eike Stumpf, *DLR, German Aerospace Center, Germany* (**42**, 3, p. 722) Article based on AIAA Paper 2004-1067

C05-091 Direct Aeroelastic Bifurcation Analysis of a Symmetric Wing Based on the Euler Equations. Ken J. Badcock, Mark A. Woodgate, and Bryan E. Richards, *University of Glasgow, Great Britain* (**42**, 3, p. 731) Article

C05-092 Control Surface Response of a Blended Wing Body Aeroelastic Wind-Tunnel Model. Martin Carlsson, *Royal Institute of Technology, Sweden* (**42**, 3, p. 738) Article based on AIAA Paper 2003-450

C05-093 Computationally Efficient Analysis and Optimization of Stiffened Thin-Walled Panels in Shear. Awie Viljoen, Andries Visser, *Council for Scientific and Industrial Research, South Africa*; and Albert A. Groenwold, *University of Pretoria, South Africa* (**42**, 3, p. 743) Article

C05-094 High-Order Finite Elements Reduced Models for Use in a Flutter Design Tool. Paolo Lisandrin and Michel van Tooren, *Delft University of Technology, The Netherlands* (**42**, 3, p. 748) Article based on AIAA Paper 2004-2002

C05-095 Design and Development of the HondaJet. Michimasa Fujino, *Honda R&D Americas, Inc.* (**42**, 3, p. 755) Design Forum based on AIAA Paper 2003-2530

C05-096 Case for Small Supersonic Civil Aircraft. Preston A. Henne, *Gulfstream Aerospace Corporation* (**42**, 3, p. 765) Design Forum based on AIAA Paper 2003-2555

C05-097 Two Supersonic Business Aircraft Conceptual Designs With and Without Sonic Boom Constraint. David C. Aronstein and Kurt L. Schueler, *Raytheon Aircraft Company* (**42**, 3, p. 775) Design Forum based on AIAA Paper 2004-697

C05-098 Inviscid Wing-Tip Vortex Behavior Behind Wings in Close Formation Flight. Cheolheui Han and William H. Mason, *Virginia Polytechnic Institute and State University* (**42**, 3, p. 787) Technical Note

C05-099 Extension of the g-Method Flutter Solution to Aeroservoelastic Stability Analysis. Moti Karpel and Boris Moulin, *Technion—Israel Institute of Technology, Israel*; and P. C. Chen, *Zona Technology Inc.* (**42**, 3, p. 789) Technical Note based on AIAA Paper 2003-1512

C05-100 Aircraft Characterization in Icing Using Flight Test Data. Edward A. Whalen and Michael B. Bragg, *University of Illinois Urbana—Champaign* (**42**, 3, p. 792) Technical Note

C05-101 Passive Shock Control Concept for Drag Reduction in Transonic Flow. Guido Dietz, *DLR, German Aerospace Center, Germany* (**42**, 3, p. 794) Technical Note

C05-102 Birth of Sweepback: Related Research at Luftfahrtforschungsanstalt–Germany. Peter G. Hamel, *Technical University Braunschweig, Germany* (**42**, 4, p. 801) History of Key Technologies based on AIAA Paper 2003-5541

C05-103 Evolution of Structures Design Philosophy and Criteria. Michael Mohaghegh, *The Boeing Company* (**42**, 4, p. 814) History of Key Technologies based on AIAA Paper 1785-2004

C05-104 Joined-Wing Aeroelastic Design with Geometric Nonlinearity. Maxwell Blair, *U.S. Air Force Research Laboratory*; Robert A. Canfield, *Air Force Institute of Technology*; and Ronald W. Roberts, *U.S. Air Force Research Laboratory* (**42**, 4, p. 832) Article

C05-105 Multistage Trajectory Optimization with Radar Range Constraints. Martin Norsell, *Kungliga Tekniska Högskolan, Sweden* (**42**, 4, p. 849) Article

C05-106 Growth and Operating Patterns of Regional Jets in the United States. Aleksandra Mozdzanowska and John Hansman, *Massachusetts Institute of Technology* (**42**, 4, p. 858) Article

C05-107 Numerical Simulations of Membrane Wing Aerodynamics for Micro Air Vehicle Applications. Yongsheng Lian and Wei Shyy, *University of Florida* (**42**, 4, p. 865) Article based on AIAA Paper 2003-1726

C05-108 Effect of Unsteady Blade Pitching Motion on Aerodynamic Performance of Microrotorcraft. Jongmin Kim and Nikhil A. Koratkar, *Rensselaer Polytechnic Institute* (**42**, 4, p. 874) Article

C05-109 Reduced Order Modeling of Unsteady Flows Without Static Correction Requirement. Morteza Behbahani-Nejad, *Chamran University of Ahwaz, Iran*; Hassan Haddadpour, *Sharif University of Tecnology, Iran*; and Vahid Esfahanian, *University of Tehran, Iran* (**42**, 4, p. 882) Article

C05-110 Transonic Drag Prediction Using an Unstructured Multigrid Solver. Dimitri J. Mavriplis, *NASA Langley Research Center*; and David W. Levy, *Cessna Aircraft Company* (**42**, 4, p. 887) Article based on AIAA Paper 2002-0838

C05-111 Wake Vortex Alleviation Flow Field Studies. Donald A. Durston, Stephen M. Walker, and David M. Driver, *NASA Ames Research Center*; Stephen C. Smith, *NASA Ames Research Center*; and Ömer Savas, *University of California* (**42**, 4, p. 894) Article based on AIAA Paper 2004-1073

C05-112 Pressure-Sensitive Paint Measurements in a Blowdown Wind Tunnel. Channa Raju and P. R. Viswanath, *National Aerospace Laboratories* (**42**, 4, p. 908) Article

C05-113 Comparison of Wake-Vortex Parameters Measured by Pulsed and Continuous-Wave Lidars. Friedrich Köpp and Stephan Rahm, Igor Smakikho, *DLR German Aerospace Research Center, Germany*; Agnes Dolfi and Jean-Pierre Cariou, *ONERA, France*; and Michael Harris, *QinetiQ Malvern, Great Britain* (**42**, 4, p. 916) Article

C05-114 Flight-Simulator Study of Airplane Encounters with Perturbed Trailing Vortices. Roberto E. Loucel and Jeffrey D. Crouch, *Boeing Commercial Airplanes* (**42**, 4, p. 924) Article based on AIAA Paper 2004-1074

C05-115 Airbus, ONERA, and DLR Results from the Second AIAA Drag Prediction Workshop. Olaf P. Brodersen and Mark Rakowitz, *DLR, German Aerospace Center, Germany*; Stephane Amant and Pascal Larrieu, *Airbus France, France*; Daniel Destarac, *ONERA, France*; and Mark Suttcliffe, *Airbus Deutschland, Germany* (**42**, 4, p. 932) Article based on AIAA Paper 2004-0391

C05-116 Modeling of Aerodynamic Coupling Between Aircraft in Close Proximity. Atilla Dogan and Sriram Venkataramanan, *University of Texas at Arlington*; and William Blake, *U.S. Air Force Research Laboratory* (**42**, 4, p. 941) Article based on AIAA Paper 2003-5385

C05-117 Worst-Case Gust-Response Analysis for Typical Airfoil Section with Control Surface. Atsushi Kanda, *Japan Aerospace Exploration Agency, Japan*; and Earl H. Dowell, *Duke University* (**42**, 4, p. 956) Article

C05-118 Scalable Computational Steering for Visualization/Control of Large-Scale Fluid Dynamics Simulations. Anirudh Modi, Nilay Sezer-Uzol, Lyle N. Long, and Paul E. Plassmann, *Pennsylvania State University* (**42**, 4, p. 963) Article

C05-119 Aerodynamic Drag of Streamers and Flags. Anna Carruthers and Antonio Filippone, *The University of Manchester, Great Britain* (**42**, 4, p. 976) Article

C05-120 Sting Effects on Store Captive Loads. Leiyong Y. Jiang, F. C. Tang, Ali Benmeddour, and Francois Fortin, *National Research Council Canada, Canada* (**42**, 4, p. 983) Article based on AIAA Paper 2001-0575

C05-121 A General Purpose Euler and Navier–Stokes Solver for Structured and Unstructured Grids. Mortaza Mani and Andrew Cary, *The Boeing Company*; and S. V. Ramakrishnan, *Hypercomp, Inc.* (**42**, 4, p. 991) Article based on AIAA Paper 2004-524

C05-122 Reducing Conservatism in Flutterometer Predictions Using Volterra Modeling with Modal Parameter Estimation. Rick Lind and Joao P. Mortagua, *University of Florida* (**42**, 4, p. 998) Article

C05-123 Aeroelastic Calculations for the Hawk Aircraft Using the Euler Equations. Mark A. Woodgate, Ken J. Badcock, Abdul M. Rampurawala, and Bryan E. Richards, *University of Glasgow, Great Britain*; Dario Nardini and Michael Henshaw, *BAE SYSTEMS, Great Britain* (**42**, 4, p. 1005) Article

C05-124 Aeroelastic Stability Enhancement and Vibration Suppression in a Composite Helicopter Rotor. Senthil Murugan and Ranjan Ganguli, *Indian Institute of Science, India* (**42**, 4, p. 1013) Article

C05-125 Numerical Investigation of Nonlinear Aeroelastic Effects on Flexible High-Aspect-Ratio Wings. Joseph A. Garcia, *NASA Ames Research Center* (**42**, 4, p. 1025) Article

C05-126 Design and Evaluation of Composite Fuselage Panels Subjected to Combined Loading Conditions. Damodar Ambur and Marshall Rouse, *NASA Langley Research Center* (**42**, 4, p. 1037) Article

C05-127 Effect of Atmospheric Transmission and Radiance on Aircraft Infared Signatures. Arvind G. Rao and Shripad P. Mahulikar, *Indian Institute of Technology, Bombay, India* (**42**, 4, p. 1046) Article

C05-128 Thrust-Matching Requirements for the Conceptual Design of Hypersonic Waverider Vehicles. Kashif H. Javaid and Varnavas C. Serghides, *Imperial College London, Great Britain* (**42**, 4, p. 1055) Article based on AIAA Paper 2003-6953

C05-129 Spline-Based Airfoil Curvature Smoothing and Its Applications. Wu Li and Steve Krist, *NASA Langley Research Center* (**42**, 4, p. 1065) Article

C05-130 Improved Harmonic Large-Angle Fuselage Aerodynamics Model. Joseph A. Huwaldt, *U.S. Army Research, Development, and Engineering Command* (**42**, 4, p. 1075) Technical Note

C05-131 Some Characteristics of Supersonic Transport Trajectories. Robert Windhorst, *NASA Ames Research Center*; and Mark Ardema, *Santa Clara University* (**42**, 4, p. 1079) Technical Note based on AIAA Paper 2000-4247

C05-132 Aerodynamic Drag of Parafoils. Anna C. Carruthers and Antonio Filippone, *The University of Manchester, Great Britain* (**42**, 4, p. 1081) Technical Note

C05-133 Impingement of a von Karman Vortex Street on a Delta Wing. Ismael Heron and Roy Y. Myose, *Wichita State University* (**42**, 4, p. 1084) Technical Note based on AIAA Paper 2004-4731

C05-134 Biologically Inspired Fixed-Wing Configuration Studies. Barry S. Lazos, *NASA Langley Research Center* (**42**, 5, p. 1089) Article

C05-135 Novel Hierarchical Modular Control Methodology for Closed-Loop-Flow Control Applications. Mehul P. Patel, Richard M. Kolacinski, and Troy S. Prince, *Orbital Research, Inc.*; James Myatt, *U.S. Air Force Research Laboratory*; and T. T. Ng, *University of Toledo* (**42**, 5, p. 1099) Article

C05-136 Discrete-Blade, Navier–Stokes Computational Fluid Dynamics Analysis of Ducted-Fan Flow. Gene C. Ruzicka and Roger C. Strawn, *NASA Ames Research Center*; and Edward T. Meadowcroft, *The Boeing Company* (**42**, 5, p. 1109) Article based on AIAA Paper 2004-0048

C05-137 Modified Shear-Stress Transport Turbulence Model for Supersonic Flows. Sang Dug Kim and Dong Joo Song, *Yeungnam University, South Korea* (**42**, 5, p. 1118) Article

C05-138 The Flow on the Apex of a Sharp-Edged Delta Wing. Niek G. Verhaagen and Victor F. Kunst, *Delft University of Technology, The Netherlands* (**42**, 5, p. 1126) Article based on AIAA Paper 2004-1065

C05-139 Nose Bluntness for Side-Force Control on Circular Cones at High Incidence. Rajan Kumar and P. R. Viswanath, *National Aerospace Laboratories, India*; and O. N. Ramesh, *Indian Institute of Science, India* (**42**, 5, p. 1133) Article based on AIAA Paper 2004-37

C05-140 Active Control of Flow Separation from Supercritical Airfoil Leading-Edge Flap Shoulder. Latunia Pack Melton, Norman W. Schaeffler, and Chungsheng Yao, *NASA Langley Research Center*; and Avi Seifert, *Tel-Aviv University, Israel* (**42**, 5, p. 1142) Article based on AIAA Paper 2002-3156

C05-141 Automatic Transition Prediction and Application to High-Lift Multi-Element Configurations. Andreas M. Krumbein, *DLR, German Aerospace Center, Germany* (**42**, 5, p. 1150) Article based on AIAA Paper 2004-2543

C05-142 Data Summary from Second AIAA Computational Fluid Dynamics Drag Prediction Workshop. Kelly R. Laflin, Steven M. Klausmeyer, and Tom Zickuhr, *Cessna Aircraft Company*; John C. Vassberg, *The Boeing Company*; Richard A. Wahls and Joseph H. Morrison, *NASA Langley Research Center*; Olaf P. Brodersen and Mark E. Rakowitz, *DLR, German Aerospace Center, Germany*; Edward N. Tinoco, *The Boeing Company*; and Jean-Luc Godard, *ONERA, France* (**42**, 5, p. 1165) Article based on AIAA Paper 2004-0555

C05-143 Measurements of Wake Vortices Interacting with the Ground. David C. Burnham, *Scientific & Engineering Solutions, Inc.*; and James N. Hallock, *John A. Volpe National Transportation Systems Center* (**42**, 5, p. 1179) Article based on AIAA Paper 1998-0593

C05-144 Ideal Aerodynamics of Ground Effect and Formation Flight. Rachel M. King and Ashok Gopalarathnam, *North Carolina State University* (**42**, 5, p. 1188) Article based on AIAA Paper 2004-0906

C05-145 Tip Vortex Behind a Wing Oscillated with Small Amplitude. Tim Lee and David M. Birch, *McGill University, Canada* (**42**, 5, p. 1200) Article

C05-146 Modeling Delta Wing Limit-Cycle Oscillations Using a High-Fidelity Structural Model. Peter J. Attar, *Computational Sciences Branch, Wright–Patterson Air Force Base*; Earl H. Dowell and John R. White, *Duke University* (**42**, 5, p. 1209) Article based on AIAA Paper 2004-1692

C05-147 Assessment of Comprehensive Analysis Calculation of Airloads on Helicopter Rotors. Hyeonsoo Yeo and Wayne Johnson, *NASA Ames Research Center* (**42**, 5, p. 1218) Article

C05-148 Simultaneous-Perturbation-Stochastic-Approximation Algorithm for Parachute Parameter Estimation. Govindarajan Kothandaraman and Mario Rotea, *Purdue University* (**42**, 5, p. 1229) Article based on AIAA Paper 2003-2118

C05-149 Flutter-Margin Method Accounting for Modal Parameters Uncertainties. Dominique Poirel, *Royal Military College of Canada, Canada*; Shane Dunn, *Defence Science and Technology Organisation, Australia*; and Jay Porter, *University of Waterloo, Canada* (**42**, 5, p. 1236) Article

C05-150 Semi-Active Vibration Isolation Using Magnetorheological Isolators. Young-Tai Choi and Norman M. Wereley, *University of Maryland*; and Young-Sik Jeon, *Yuhan College, South Korea* (**42**, 5, p. 1244) Article

C05-151 Aerodynamic Active Control For Fin-Buffet Load Alleviation. Christian Breitsamter, *Technische Universität München, Germany* (**42**, 5, p. 1252) Article based on AIAA Paper 2000-0656

C05-152 Dynamic Response of Aeroservoelastic Systems to Gust Excitation. Moti Karpel and Boris Moulin, *Technion—Israel Institute of Technology, Israel*; and P. C. Chen, *ZONA Technology* (**42**, 5, p. 1264) Article

C05-153 Structural Efficiency of Stitched Composite Panels with Stiffener Crippling. Dawn Jegley, *NASA Langley Research Center* (**42**, 5, p. 1273) Article

C05-154 Analysis of the Cold-Working Process on Holes Containing Preexisting Cracks. W. S. Johnson, and Jidong Kang, *Georgia Institute of Technology* (**42**, 5, p. 1281) Article

C05-155 Biodynamic Response Mitigation to Shock Loads Using Magnetorheological Helicopter Crew Seat Suspensions. Young-Tai Choi and Norman M. Wereley, *University of Maryland* (**42**, 5, p. 1288) Article

C05-156 Range Maximization for Emergency Landing After Engine Cutoff. Ilana Shapira and Joseph Ben-Asher, *Technion—Israel Institute of Technology, Israel* (**42**, 5, p. 1296) Article

C05-157 Investigating Conformance Monitoring Issues in Air Traffic Control Using Fault Detection Techniques. Tom G. Reynolds and R. J. Hansman, *Massachusetts Institute of Technology* (**42**, 5, p. 1307) Article

C05-158 Near-Surface Topology of Unmanned Combat Air Vehicle Planform: Reynolds Number Dependence. Michel Elkhoury, Mehmet M. Yavuz, and Donald Rockwell, *Lehigh University* (**42**, 5, p. 1318) Article

C05-159 Reliability-Based Wing Design Optimization Using Trust Region-Sequential Quadratic Programming Framework. Joongki Ahn, Suwhan Kim, and Jang-Hyuk Kwon, *Korea Advanced Institute of Science and Technology, South Korea* (**42**, 5, p. 1331) Article

C05-160 Parallel Overset-Grid Euler Solution of Generic Wing Pylon and Finned Store. Erhan Tarhan, *TUSAS, Turkish Aircraft Industries, Inc., Turkey*; and Mehmet S. Kavsaoglu, *Istanbul Technical University, Turkey* (**42**, 5, p. 1337) Article

C05-161 On the Uniqueness of the Minimum State Representation. Eliahu Nissim, *Technion—Israel Institute of Technology, Israel* (**42**, 5, p. 1339) Technical Note

C05-162 Nonlinearc Aeroelastic Analysis of an Airfoil Using CFD-Based Indicial Approach. Dong-Hyun Kim, *Gyeongsang National University, South Korea*; In Lee, *Korea Advanced Institute of Science and Technology, South Korea*; Piergiovanni Marzocca, *Clarkson University*; Liviu Librescu, *Virginia Polytechnic Institute and State University*; and Steven Schober, *Clarkson University* (**42**, 5, p. 1340) Technical Note based on AIAA Paper 2004-1756

C05-163 Equilibrium Manifold Linearization Model for Normal Shock Position Control Systems. Yu Daren, Cui Tao, and Bao Wen, *Harbin Institute of Technology, China (PRC)* (**42**, 5, p. 1344) Technical Note

C05-164 Subsonic Aircraft Design Optimization with Neural Network and Regression Approximators. Surya N. Patnaik, *Ohio Aerospace Institute*; Rula M. Coroneos, James D. Guptill, and Dale A. Hopkins, *NASA John H. Glenn Research Center* (**42**, 5, p. 1347) Technical Note

C05-165 Shock-Based Waverider Design with Pressure Gradient Corrections and Computational Simulations. Mark J. Lewis and Marie-Laure Chauffour, *University of Maryland* (**42**, 5, p. 1350) Technical Note based on AIAA Paper 2004-3405

C05-166 New Blockage-Correction Method for Separated Flows in a Subsonic Wind Tunnel. Seung-Hee Kang, *Korea Advanced Institute of Science and Technology, South Korea*; Seung-Ki Ahn, *Agency for Defence Development, South Korea*; and Oh Joon Kwon, *Korea Advanced Institute of Science and Technology, South Korea* (**42**, 5, p. 1352) Technical Note

C05-167 Maximum Likelihood Method Based on Interior Point Algorithm for Aircraft Parameter Identification. Xinsheng Zou and Chunwen Li, *Tsinghua University, China (PRC)* (**42**, 5, p. 1355) Technical Note

C05-168 Aircraft Trajectory Planning for Terrain Following Incorporating Actuator Constraints. Paul Williams, *RMIT University, Australia* (**42**, 5, p. 1358) Technical Note

C05-169 Automatic Transition Prediction for High-Lift Systems Using a Hybrid Flow Solver. Andreas M. Krumbein, *DLR, German Aerospace Research Center, Germany* (**42**, 5, p. 1362) Article

C05-170 Wing Tip Vortex in the Near Field: An Experimental Study. Giovanni Lombardi, *University of Pisa, Italy*; and Peter Skinner, *Defencetek–CSIR, South Africa* (**42**, 5, p. 1366) Technical Note

C05-171 Drag Evolution of a Rectangular Wing with a Triggered Wing-Tip Separation. Pascal L. Ardonceau, *Ecole Nationale Supérieure de Mécanique et d'Aerotechnique, France*; and Simon Trapier, *ONERA, France* (**42**, 5, p. 1369) Technical Note

C05-172 Deforming Grid Technique Applied to Unsteady Viscous Flow Simulation by a Fully Implicit Solver. Jie Li, Zhengbin Liu, and Shouzhi Huang, *Northwestern Polytechnical University, China (PRC)* (**42**, 5, p. 1371) Technical Note based on AIAA Paper 2005-1221

C05-173 Unit Cost Estimation Methodology for Commercial Aircraft. Nikolaos L. Tirovolis and Varnavas C. Serghides, *Imperial College London, Great Britain* (**42**, 6, p. 1377) Article

C05-174 Multi-Attribute Value Approach to Business Airplane Product Assessment. Troy D. Downen, Deborah J. Nightingale, and Christopher L. Magee, *Massachusetts Institute of Technology* (**42**, 6, p. 1387) Article

C05-175 Knowledge Based Engineering System to Estimate Manufacturing Cost for Composite Structures. Jin-Woo Choi, Donald Kelly, John Raju, and Carl Reidsema, *University of New South Wales, Australia* (**42**, 6, p. 1396) Article

C05-176 Observations from the Inspection of an Aged Fuselage Panel. Paul N. Clark, *Hill Air Force Base*; Kimberli Jones, *University of Utah*; J. T. Huang, *Lockheed Martin Aeronautics Company*; and David W. Hoeppner, *University of Utah* (**42**, 6, p. 1403) Article

C05-177 Optimum Two-Per-Revolution Inputs for Improved Rotor Performance. Roberto Celi and Rendy P. Cheng, *University of Maryland* (**42**, 6, p. 1409) Article

C05-178 Movable Tip Strakes and Wing Aerodynamics. Vojin R. Nikolic, *Minnesota State University Mankato* (**42**, 6, p. 1418) Article

C05-179 Off-Design Reynolds Number Effects for a Supersonic Transport. Lewis R. Owens, Richard A. Wahls, and S. Melissa Rivers, *NASA Langley Research Center* (**42**, 6, p. 1427) Article based on AIAA Paper 2001-0911

C05-180 Numerical Simulation of Icing Clouds in the NASA Glenn Icing Research Tunnel. Chirag Bhargava and Eric Loth, *University of Illinois at Urbana–Champaign*; and Mark Potapczuk, *NASA John H. Glenn Research Center at Lewis Field* (**42**, 6, p. 1442) Article

C05-181 Detached Eddy Simulations for Iced Airfoils. Jianping Pan and Eric Loth, *University of Illinois at Urbana–Champaign* (**42**, 6, p. 1452) Article based on AIAA Paper 2004-0564

C05-182 Stall Hysteresis of an Airfoil with Slotted Flap. Kasim Biber, *Turkey* (**42**, 6, p. 1462) Article based on AIAA Paper 05-1230

C05-183 Constant Lift Coefficient Turns. Gil Iosilevskii, *Technion–Israel Institute of Technology, Israel* (**42**, 6, p. 1471) Article

C05-184 Approach to Induced Drag Reduction with Experimental Evaluation. David Eller and Sebastian Heinze, *Royal Institute of Technology, Sweden* (**42**, 6, p. 1478) Article based on AIAA Paper 2004-1513

C05-185 Vortex-Generator Model and Its Application to Flow Control. Adam Jirasek, *Swedish Defence Research Agency FOI, Sweden* (**42**, 6, p. 1486) Article based on AIAA Paper 2004-4965

C05-186 Aircraft Spin Recovery, with and without Thrust Vectoring, Using Nonlinear Dynamic Inversion. P. K. Raghavendra, Tuhin Sahai, P. Ashwani Kumar, Manan Chauhan, and N. Ananthkrishnan, *Indian Institute of Technology, India* (**42**, 6, p. 1492) Article based on AIAA Paper 2004-0378

C05-187 Support Interference for a Maneuvering Delta Wing. Gordon Taylor and Ismet Gursul, *University of Bath, Great Britain* (**42**, 6, p. 1504) Article

C05-188 Computational Study of F/A-18 E/F Abrupt Wing Stall in the Approach Configuration. Robert J. Niewoehner and Joshua Filbey, *U.S. Naval Academy* (**42**, 6, p. 1516) Article based on AIAA Paper 2001-4194

C05-189 Drag Prediction of Engine-Airframe Interference Effects with CFX-5. Robin B. Langtry, Martin Kuntz, and Florian Menter, *ANSYS CFX, Germany* (**42**, 6, p. 1523) Article based on AIAA Paper 2004-0392

C05-190 Effect of Tip Vortex on Wing Aerodynamics of Micro Air Vehicles. Dragos Viieru, Roberto Albertani, Wei Shyy, and Peter G. Ifju, *University of Florida* (**42**, 6, p. 1530) Article based on AIAA Paper 2004-4971

C05-191 Effect of Camber on the Aerodynamics of Adaptive-Wing Micro Air Vehicles. William Null and Sergey Shkarayev, *University of Arizona* (**42**, 6, p. 1537) Article based on AIAA Paper 2004-2694

C05-192 Novel Taguchi-Simulated Annealing Method Applied to Airfoil and Wing Planform Optimization. Jenn-Long Liu, *Leader University, Taiwan (ROC)* (**42**, 6, p. 1537) Article

C05-193 In-Flight Thrust Measurements of Propeller-Driven Airplanes. Mehdi Sabzehparvar, *Amir Kabir University, Iran* (**42**, 6, p. 1543) Article

C05-194 Identification of Experimental Unsteady Aerodynamic Impulse Responses. Walter A. Silva, David J. Piatak, and Robert C. Scott, *NASA Langley Research Center* (**42**, 6, p. 1548) Article based on AIAA Paper 2003-1959

C05-195 Analysis of Model Rotor Blade Pressures During Parallel Interaction with Twin Vortices. Frank N. Coton, Richard B. Green, and Roderick A. Galbraith, *University of Glasgow, Great Britain* (**42**, 6, p. 1552) Article

C05-196 Flutter Analysis of an F-16A/B in Heavy Store Configuration. Samir Bennani, *Delft University of Technology, The Netherlands*; Jan-Willem van Staveren, *ADSE Consultancy and Engineering Services, The Netherlands*; Bert Beuker, *Royal Netherlands National Air Force, The Netherlands*; and Joshua J. Meijer, *National Aerospace Research Laboratory* (**42**, 6, p. 1565) Article based on AIAA Paper 2002-3967

C05-197 Modeling and Detection of Limit-Cycle Oscillations Using Adaptable Linear Models. Michael R. Johnson, *U.S. Air Force SEEK EAGLE Office*; and Jose C. Principe, *University of Florida* (**42**, 6, p. 1575) Article

C05-198 Limit Cycle Oscillation Flight-Test Results for Asymmetric Store Configurations. Kenneth S. Dawson and Daniel L. Maxwell, *TYBRIN Corporation* (**42**, 6, p. 1588) Article based on AIAA Paper 2003-1427

C05-199 Robust Match-Point Solutions Using Describing Function Method. Dario H. Baldelli, *ZONA Technology, Inc.*; Richard Lind, *University of Florida*; and Martin Brenner, *NASA Dryden Flight Research Center* (**42**, 6, p. 1596) Article

C05-200 Parametric Modeling of Movables for Structural Analysis. Antoon H. van der Laan and Michel J. van Tooren, *Delft University of Technology, The Netherlands* (**42**, 6, p. 1605) Article based on AIAA Paper 2004-1849

C05-201 Aircraft Structural Morphing Using Tendon-Actuated Compliant Cellular Trusses. Deepak S. Ramrakhyani, George A. Lesieutre, Mary I. Frecker, and Smita Bharti, *Pennsylvania State University* (**42**, 6, p. 1614) Article based on AIAA Paper 2004-1728

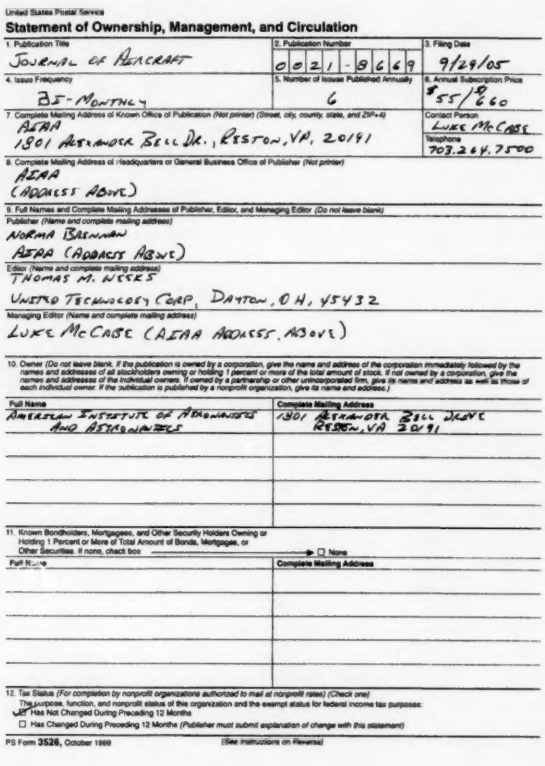
C05-202 Inverse Design of Adaptive Airfoils with Aircraft Performance Considerations. Jeffrey K. Jepson and Ashok Gopalarathnam, *North Carolina State University* (**42**, 6, p. 1621) Article based on AIAA Paper 2004-0028

C05-203 Dynamic Analysis of Aircraft Landing Impact Using Landing-Region-Based Model. Xiaohui Wei and Hong Nie, *Nanjing University of Aeronautics and Astronautics, China (PRC)* (**42**, 6, p. 1631) Article

C05-204 Optimum Loading of a Wing with a Slit. Jean-Jacques Chattot, *University of California, Davis* (**42**, 6, p. 1637) Technical Note

C05-205 Undesired Equilibria of Self-Deploying Pneumatic Envelopes. Frank E. Baginski, *George Washington University*; and Willi W. Schur, (**42**, 6, p. 1639) Technical Note based on AIAA Paper 2005-1803

C05-206 Aerodynamic Characteristics of an Elliptic Airfoil at Low Reynolds Number. Kijung Kwon, *Korea Aerospace Research Institute, South Korea*; and Seung O. Park, *Korea Advanced Institute of Science and Technology, South Korea* (**42**, 6, p. 1642) Technical Note based on AIAA Paper 2005-4762



United States Postal Service
Statement of Ownership, Management, and Circulation

1. Publication Title	2. Publication Number	3. Filing Date
JOURNAL OF AIRCRAFT	0021-8669	9/29/05
4. Issue Frequency	5. Number of Issues Published Annually	6. Annual Subscription Price
BI-MONTHLY	6	$55/$60

7. Complete Mailing Address of Known Office of Publication (Not printer) (Street, city, county, state, and ZIP+4): AIAA, 1801 ALEXANDER BELL DR., RESTON, VA, 20191 — Contact Person: LUKE MCCABE; Telephone: 703.264.7500

8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not printer): AIAA (ADDRESS ABOVE)

9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do not leave blank)
Publisher (Name and complete mailing address): NORMA BRENNAN, AIAA (ADDRESS ABOVE)
Editor (Name and complete mailing address): THOMAS M. WEEKS, UNITED TECHNOLOGIES CORP, DAYTON, OH, 45432
Managing Editor (Name and complete mailing address): LUKE MCCABE (AIAA ADDRESS, ABOVE)

10. Owner (Do not leave blank. If the publication is owned by a corporation, give the name and address of the corporation immediately followed by the names and addresses of all stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, give the names and addresses of the individual owners. If owned by a partnership or other unincorporated firm, give its name and address as well as those of each individual owner. If the publication is published by a nonprofit organization, give its name and address.)

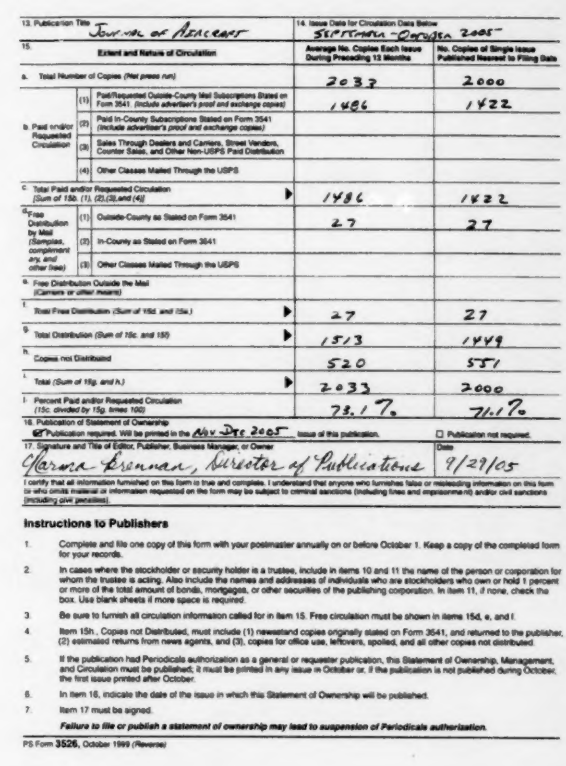
Full Name	Complete Mailing Address
AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS	1801 ALEXANDER BELL DRIVE RESTON, VA 20191

11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities. If none, check box → ☐ None

Full Name	Complete Mailing Address

12. Tax Status (For completion by nonprofit organizations authorized to mail at nonprofit rates) (Check one)
The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes:
☑ Has Not Changed During Preceding 12 Months
☐ Has Changed During Preceding 12 Months (Publisher must submit explanation of change with this statement)

PS Form **3526**, October 1999 (See instructions on Reverse)



13. Publication Title: JOURNAL OF AIRCRAFT	14. Issue Date for Circulation Data Below: SEPTEMBER-OCTOBER 2005	
15. Extent and Nature of Circulation	Average No. Copies Each Issue During Preceding 12 Months	No. Copies of Single Issue Published Nearest to Filing Date
a. Total Number of Copies (Net press run)	2037	2000
b. Paid and/or Requested Circulation (1) Paid/Requested Outside-County Mail Subscriptions Stated on Form 3541. (Include advertiser's proof and exchange copies)	1486	1422
(2) Paid In-County Subscriptions Stated on Form 3541 (Include advertiser's proof and exchange copies)		
(3) Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Non-USPS Paid Distribution		
(4) Other Classes Mailed Through the USPS		
c. Total Paid and/or Requested Circulation (Sum of 15b. (1), (2),(3),and (4)) ▶	1486	1422
d. Free Distribution by Mail (Samples, complimentary, and other free) (1) Outside-County as Stated on Form 3541	27	27
(2) In-County as Stated on Form 3541		
(3) Other Classes Mailed Through the USPS		
e. Free Distribution Outside the Mail (Carriers or other means)		
f. Total Free Distribution (Sum of 15d. and 15e.) ▶	27	27
g. Total Distribution (Sum of 15c. and 15f) ▶	1513	1449
h. Copies not Distributed	520	551
i. Total (Sum of 15g. and h.) ▶	2033	2000
j. Percent Paid and/or Requested Circulation (15c. divided by 15g. times 100)	98.1%	98.1%

16. Publication of Statement of Ownership
☑ Publication required. Will be printed in the NOV-DEC 2005 issue of this publication. ☐ Publication not required.

17. Signature and Title of Editor, Publisher, Business Manager, or Owner: Norma Brennan, Director of Publications — Date: 9/29/05

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of Periodicals authorization.
